

August 31st, 2018

Robur Corporation would like to invite you to attend our Technical Training class on Robur's latest absorption cooling and heating technology. These classes are available to professionals within the HVAC and Mechanical Industries and are designed for servicing and installation technicians.

You will have an option of attending one of two classes this fall with the first scheduled for October 9th through the 11th, 2018 and the second scheduled for October 23rd, through the 25th, 2018.

These training classes will be held at the Robur Corporation offices located at 827 E. Franklin Street in Evansville, IN 47711 and qualify the attendee's as certified technicians upon receiving a passing grade on the certification test.

This technical training will cover the following models:

ACF60 Series Chillers (ST, HT, TK, LB, & HR Versions); **AYF60-119** Series Chiller Heater Models – Two & Four Pipe ; **GAHP-AR** Reversible Cycle Cooling and Heating, Heat Pump ; **GAHP-A** Heat Only Heat Pump ; **GAHP-W** and **GAHP-W-LB** Water-Water Heat Pumps.

These classes will cover non-sealed system aspects only and do not include in-depth training and troubleshooting of the refrigerant system. These classes will include product & component review, understanding of the various operations, installation, start-up procedures, maintenance, troubleshooting, and controls programming for the individual unit control boards and optional Robur DDC Controller. Hands on training, each desk (two students) will have a working control board and DDC Controller. For additional hands on training we will use the GAHP-AR (Reversible Cycle Heat Pump).

The class agenda will be as follows:

Day 1

- 8:00 AM Start
- Overview of the Various Robur Equipment Types and Module Specifics
- Sealed Refrigerant System Components Understanding and Cycle Review
- Break
- Hydronic & Combustion Components Cycle & Review (All Models)
